- Management Skills
- Creativity
- Critical Thinking
- Leadership

Experience

Human-Following Robot using IoT Academic Project | REVA University

Built a human-following robot using Arduino, IR sensors, and ultrasonic sonar with motor drivers, featuring real-time obstacle detection for smooth navigation.

AI for the Future & AI for Sustainability | REVA University

Attended workshops on AI for Future and Sustainability, gaining insights into AI applications, ethics, and real-world use cases.

RV University Hackathon

Participated in a tech hackathon, collaborating with peers to brainstorm and develop innovative solutions under time constraints, enhancing problem-solving and teamwork skills.
